

## PRATYUSH MAJUMDAR

Pune, Maharashtra | P: +91-76662-34983

[pratyushmajumdar27@gmail.com](mailto:pratyushmajumdar27@gmail.com) | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

## EDUCATION

---

MES Institute of Management and Career Courses  
MCA (Pursuing) – September 2024 - April 2026

Mayur Colony, Pune  
CGPA: 9.62

MES Garware College of Commerce  
BCA – September 2021 - April 2024

Karve Road, Pune  
CGPA: 9.45

## EXPERIENCE (PROJECTS)

---

### AI Assistant - AI Developer

- Developed an AI Assistant using Python, Streamlit, and LangChain, enabling users to interact with an intelligent conversational agent for various tasks, improving task efficiency by 25%.
- Implemented vector embeddings using Hugging Face Embeddings and LangGraph along with custom tools to enhance the chatbot's ability to manage complex interactions, boosting conversation handling capabilities by 30%, while resolving the user queries and streamline the process.
- Incorporated a Large Language Model (LLM) integrated with Astra DB to enable precise PDF/URL-based question-and-answer functionality, achieving a 20% improvement in query accuracy and response relevance.
- [Live Demo](#) | [GitHub Repository](#)

### TaxQueryAI - Generative AI Engineer

- Engineered TaxQueryAI, a MySQL database Q&A tool using Python, Next.js, and LangChain framework, enabling users to query tax-related data effortlessly through natural language, boosting query efficiency by 25%.
- Leveraged MySQL to dynamically generate queries from the database and applied NLP techniques to transform outputs into humanized responses, enhancing user comprehension and satisfaction by 30%.
- Integrated LangChain framework for advanced language understanding, ensuring accurate and contextually relevant SQL query generation, improving efficiency by 25%.
- [Live Site](#) | [GitHub Repository](#)

### Flipkart Products Analysis - Data Engineer/Analyst

- Architected a comprehensive Flipkart Products Analysis pipeline combining data engineering and data analysis, utilizing Azure services like Azure Data Lake Gen 2, Azure Data Factory, and Azure Databricks for efficient Extract, Transform, Load (ETL) processes.
- Designed an interactive dashboard using Power BI to track key metrics and trends from cleaned data, enhancing data-driven decision-making and improving product strategy by 30%.
- Automated data validation and anomaly detection using Azure Data Factory and Databricks, improving data quality and reducing inconsistencies by 25%.

## TECHNICAL SKILLS

---

**Programming:** Python, MySQL, Linux Shell Scripting, Java

**AI/ML:** Generative AI, NLP, Machine Learning, LangChain, LangGraph, Vector Embedding, Semantic Search

**Tools:** Power BI, Excel, Git, Jupyter Notebook

**Cloud/Data Engineering:** Databricks, Azure Data Factory, Azure Data Lake, Amazon Simple Storage Service (S3)

## CERTIFICATIONS

---

Lets Talk Academy – [N3](#), JLPT – [N4](#), JLPT – [N5](#), Udemy – [Azure Data Engineer Associate](#),  
Trinity – [Data Analyst](#), Udemy – [Linux Shell Scripting](#), Cisco – [Introduction to Packet Tracer](#)

## ACHIEVEMENTS

---

- Second Prize in a Startup Idea Competition organized by SSMSIMR College.
- Assisted in a PhD project titled “English to Sanskrit Translator”.
