EDUCATION

MES Garware College of Commerce

Bachelor of Computer Application (BCA)

CGPA: 9.45

Relevant Coursework: Programming, Mathematics and Statistics, Software Engineering, Operating Systems

Karve Road, Pune

September 2021 - April 2024

EXPERIENCE (PROJECTS)

TaxQueryAI - Generative AI Engineer

- Developed TaxQueryAI, a MySQL database Q&A tool using Python, Next.js, and LangChain framework, enabling users to query tax-related data effortlessly through natural language, improving query efficiency by 25%.
- Utilized MySQL to dynamically generate queries from the database and applied Natural Language Processing (NLP) techniques to transform query results into humanized responses, improving user comprehension and satisfaction by 30%.
- Integrated LangChain framework for advanced language understanding, ensuring accurate and contextually relevant SQL query generation, improving efficiency by 25%.
- [Website](#) | [GitHub](#)

AI Assistant - AI Developer

- Created an AI Assistant using Python, Streamlit, and Langchain, enabling users to interact with an intelligent conversational agent for various tasks, improving task efficiency by 25%.
- Incorporated LangGraph and custom tools to enhance the chatbot's ability to manage complex, multi-step interactions, improving conversation handling by 35%, while enabling the chatbot to resolve the user queries and streamline the interaction process.
- Leveraged a Large Language Model (LLM) integrated with Astra DB to enable precise PDF/URL-based question-and-answer functionality, achieving a 40% improvement in query accuracy and response relevance.

Flipkart Products Analysis - Data Engineer/Analyst

- Designed a comprehensive Flipkart Products Analysis pipeline combining data engineering and data analysis, utilizing Azure services like Azure Data Lake Gen 2, Azure Data Factory, and Azure Databricks for efficient ETL processes.
- Implemented an interactive dashboard to track key metrics and trends from cleaned data, enhancing data-driven decision-making and improving product strategy and inventory management efficiency by 30%.
- Automated data validation and anomaly detection using Azure Data Factory and Databricks, ensuring high data quality and reducing inconsistencies by 25%.

CERTIFICATIONS/BADGES

Certifications: JLPT - [N4](#), JLPT - [N5](#), Udemy - [Azure Data Engineer Associate](#), Trainity - [Data Analyst](#),

Udemy - [Linux Shell Scripting](#), Cisco - [Introduction to Packet Tracer](#)

Badges: Leetcode - [Top 50 SQL Interview Questions](#)

ACHIEVEMENTS

- Runner-up in a Debate Competition organized by IMCC College.
- Second Prize in a Startup Idea Competition organized by SSMSIMR College.

ADDITIONAL

Technical Skills: Python, Generative AI, Machine Learning, Cloud Computing, Data Engineering, Data Analysis, Microsoft Excel, MySQL, Power BI, Linux Shell Scripting

Languages: Fluent in English, Hindi, Marathi, Japanese
