EDUCATION

MES Institute of Management and Career Courses
Pune MCA (Pursuing) – September 2024 - May 2026

Mayur Colony
CGPA: 9.62

MES Garware College of Commerce
BCA – September 2021 - April 2024

Karve Road, Pune
CGPA: 9.45

EXPERIENCE

Sun Fibo Technology Private Limited

Sinhagad Road, Pune

AI-ML Engineer

September 2025 - Present

- Constructed an optimized image-to-3D model generation pipeline by enhancing the feature extraction process, achieving a 25% improvement in efficiency for generating 3D models from 2D images.
- Successfully executed and refined the modified pipeline on CUDA-enabled GPUs, reducing inference time by 20% while maintaining high-fidelity 3D outputs for diverse image datasets.
- Applied advanced background removal and edge-preserving techniques, improving object isolation accuracy by 30%, leading to more precise 3D geometry reconstruction.
- Streamlined model selection and pipeline workflows, reducing computational overhead by 15% and improving overall system throughput.

PROJECTS

Flipkart Products Analysis – Data Engineer

- Orchestrated an end-to-end data pipeline to process Flipkart product datasets, handling data ingestion, cleaning, and transformation for 20,000 product records.
- Utilized Azure Databricks for scalable data preprocessing and transformation, reducing data processing time by 30%.
- Configured Azure Storage Account to store and manage raw and processed data, improving data accessibility and reliability by 25%.
- Built an interactive dashboard (Power BI) to visualize pricing trends, product categories, and brand performance, enhancing data-driven decision-making efficiency by 35%.
- [Live Demo](#) | [GitHub Repository](#)

AI Assistant - AI Developer

- Developed an AI Assistant using Python, Streamlit, and LangChain, enabling users to interact with an intelligent conversational agent for various tasks, improving task efficiency by 25%.
- Implemented vector embeddings using Hugging Face Embeddings and LangGraph along with custom tools to enhance the chatbot's ability to manage complex interactions, boosting conversation handling capabilities by 30%, while resolving the user queries and streamline the process.
- Designed and implemented a CI/CD pipeline using Jenkins, Docker, SonarQube and Nexus and deployed the application on Azure Kubernetes Service (AKS) to ensure automated build, testing, and deployment.
- [Live Demo](#) | [GitHub Repository](#)

TaxQueryAI - Generative AI Engineer

- Engineered TaxQueryAI, a MySQL database Q&A tool using Python and Next.js enabling users to query tax-related data effortlessly through natural language, boosting query efficiency by 25%.
- Leveraged MySQL to dynamically generate queries from the database and applied NLP techniques to transform outputs into humanized responses, enhancing user comprehension and satisfaction by 30%.
- Integrated LangChain framework for advanced language understanding, ensuring accurate and contextually relevant SQL query generation, improving efficiency by 25%.
- [Live Site](#) | [GitHub Repository](#)

TECHNICAL SKILLS

Programming: Python, MySQL, Linux Shell Scripting, Java

Cloud/Data Engineering: Databricks, Azure Data Factory, Azure Data Lake, Kubernetes

AI/ML: Generative AI, NLP, Machine Learning, LangChain, LangGraph, Vector Embedding, Semantic Search

Tools: Power BI, Excel, Git, Jupyter Notebook, Docker, Jenkins, SonarQube, Sonatype Nexus

LANGUAGES

- **English** - Fluent
- **Hindi** - Fluent
- **Marathi** - Intermediate
- **Japanese** - Intermediate

CERTIFICATIONS

JLPT – N3, JLPT – N4, JLPT – N5, Coursera – IBM Data Science, Trainity – Data Analyst,

Udemy – Azure Data Engineer Associate, Udemy – Linux Shell Scripting, Cisco – Introduction to Packet Tracer

ACHIEVEMENTS

- Secured First Rank in First Year MCA.
- Received Best Research Paper Award at IC2TMA 2026.
- Won First Prize in the Code Clash Competition held at IMCC.
- Won Second Place in a Debate Competition held at IMCC.
- Second Prize in a Startup Idea Competition organized by SSMSIMR College.
