EDUCATION

MES Garware College of Commerce

Bachelor of Computer Application (BCA)

CGPA: 9.45

Relevant Coursework: Programming, Mathematics and Statistics, Software Engineering, Operating Systems, Algorithms

Karve Road, Pune

September 2021 – April 2024

PROJECTS

TaxQueryAI

- Developed TaxQueryAI, a MySQL database Q&A tool using Python, Next.js, and LangChain framework, enabling users to query tax-related data effortlessly through natural language, improving query efficiency by 25%.
- Optimized query execution and response times by 35% through efficient indexing and query structuring, reducing latency and enhancing user experience.
- Integrated LangChain framework for advanced language understanding, ensuring accurate and contextually relevant SQL query generation, improving efficiency by 25%.
- Website - [TaxQueryAI](#) | Repository - [Github](#)

AI Assistant

- Created an AI Assistant using Python, Streamlit, and Langchain, enabling users to interact with an intelligent conversational agent for various tasks, improving task efficiency by 25%.
- Incorporated Langchain for advanced language processing, ensuring the generated names and menu items are contextually relevant and aligned with the restaurant's concept, resulting in a 30% improvement in user engagement and satisfaction.
- Enhanced response accuracy by 40% by fine-tuning prompt engineering and optimizing language model interactions, leading to more relevant and precise outputs.

Flipkart Products Analysis

- Designed a comprehensive Flipkart Products Analysis pipeline combining data engineering and data analysis, utilizing Azure services like Azure Data Lake Gen 2, Azure Data Factory, and Azure Databricks for efficient ETL processes.
- Implemented an interactive dashboard to track key metrics and trends from cleaned data, enhancing data-driven decision-making and improving product strategy and inventory management efficiency by 30%.
- Automated data validation and anomaly detection using Azure Data Factory and Databricks, ensuring high data quality and reducing inconsistencies by 25%.

CERTIFICATIONS/ BADGES

Certifications: [N4](#) - JLPT, [N5](#) - JLPT, [Data Analyst](#) - Trainity, [Linux Shell Scripting](#) - Udemy, [Introduction to Packet Tracer](#) - Cisco

Badges: [Top 50 SQL Interview Questions](#) - Leetcode

ACHIEVEMENTS

- Runner-up in a Debate Competition organized by IMCC College
- Second Prize in a Startup Idea Competition organized by SSMSIMR College

ADDITIONAL

Technical Skills: Python, Generative AI, Machine Learning, Cloud Computing, Data Engineering, Data Analysis, Microsoft Excel, MySQL, Power BI, Linux Shell Scripting

Languages: Fluent in English, Hindi, Marathi, Japanese
